16th February 2004

Dear Mrs. De Lange,

Thank you very much for your positive comments about the design of the New Rijksmuseum and your feedback regarding the traffic flows through the passage. You can also be sure that we are also aware of the importance and significance of the Rijksmuseum' passage for cyclist and pedestrians in the city of Amsterdam.

Due to the high number of parties involved in this project we would prefer to maintain the contact with you through the working group set by the municipality, in which you are represented. In case a presentation or a more extensive explanation is required we would be very pleased to introduce again our design to all the members interested.

Kind regards,

Antonio Cruz
